

SureRetainer® prevents backfill soil from displacing the void space under grade beams and slab edges.

DESCRIPTION

SureRetainers are made of strong, flexible plastic, and is impervious to soil and water. Its lightweight design allows nesting for storage savings and easy handling.

AVAILABLE SIZES

14" High x 36" Long
 20" High x 48" Long
 26" High x 48" Long

MATERIAL

Rigid and light weight high-density polyethylene (HDPE)

INSTALLATION

1. Place void forms and cover board as required.
2. Install steel and place concrete.
3. Dig a 1.5" to 3" groove in the soil, according to the spacing requirements above.
4. Place SureRetainer, ensuring the bottom edge is placed in the groove.
5. Back fill.
